Experience

Pravaah Consulting Inc. **September 2026 – Present**
Software Developer (Full-Stack) Intern *Bangalore, Karnataka*

- Build a Full-Stack File Sharing Web Application using **React JS**, **Tailwind CSS**, **React Bootstrap** and **Firebase** using **Firebase Emulator**, where users can Login, Upload Files and Share them through E-Mails. Setup a custom **SMTP Server** in **Node JS** for E-Mail Notifications.

Auriga IT Consulting Pvt. Ltd. **May 2025 – February 2026**
Software Developer (Front-End) Intern *Jaipur, Rajasthan*

- Acquired hands-on experience in **TypeScript**, **Tailwind CSS** and **Redux** through building internal Tools and Features.
- Collaborated in a team **Hackathon** to build **Auriga Sales Copilot** using **Amazon Q** and **LLMs** with **Next JS**, **TypeScript** and **Python**, including integration of **Google OAuth API** for Authentication and **n8n** for Automation.

Freelance **January 2025 – Present**
Software Developer *Jaipur, Rajasthan*

- Built a fully responsive business website for a **Relationship Expert** using semantic **HTML5** and modern **CSS3**. Focused on **Animations**, **Mobile-First Layout** and a clean and professional design.
- Developed a **Coaching Institute** website with pure **HTML** and **CSS** and **JavaScript**. Implemented client-side **Form Validation** and **Error Handling** for a contact form.

Projects

Shopper | *React JS, Tailwind CSS* | https://shopper-peach-iota.vercel.app/ **November 2025**

- An **E-Commerce Website** for Clothing.
- Used **Context API** for Global State Management and avoided the problem of **Prop Drilling**.
- Handled Navigation by implementing **React-Router-DOM** and **useNavigate() Hook**.
- Managed Forms using **React-Hook-Form** and custom **RegEx** patterns for secure Login and Registration.
- Fetched self-created public JSON API by using **Axios**.

Projectopedia | *React JS, Tailwind CSS* | https://projectopedia.vercel.app/ **January 2026**

- A **Project Management System** for managing a complete Project Lifecycle.
- Optimized Performance by implementing **Lazy Loading**, **Conditional Rendering** and **Memoization**.
- Used **Custom Hooks**, **Portals**, **Lifting State Up**, etc. and wrote a clean and readable code.

Chat App | *HTML, CSS, JavaScript, Node JS* | https://chat-app-ii65.onrender.com/ **January 2026**

- A full-stack retro-style **Chat App** enabling real-time Bi-Directional communication via the **WebSocket Protocol**.
- Implemented **Session Management** with Conflict Detection, allowing users to seamlessly take over Active Sessions when logging in from a new Tab or Device.
- Maintained persistent connections via a **Server-Side Heartbeat**, while synchronizing **Client States** (User Lists, Join/Leave Broadcasts), and enhanced UX with **Message Timestamps** and an **Enter To Send Toggle**.
